

Math 8100 - Real Analysis I - Fall 2014

Instructor: Neil Lyall

Office: Boyd 602A

Email: lyall@math.uga.edu

Office hours: TBA and by appointment.

Lectures: MWF 10:10-11:00, Boyd 326.

Course web page:

www.math.uga.edu/~lyall/8100Fall2014

Principal Textbook:

Real Analysis, by E. M. Stein and R. Shakarchi

Secondary References:

Real Analysis, by G. B. Folland

An introduction to measure theory, by Terrence Tao

Real and Complex Analysis, by W. Rudin

For additional references and supplementary notes, see the course webpage.

Homework: Homework will be assigned regularly. I anticipate that there will be 10 assignments over the course of the semester. No late homework will be accepted.

While I *strongly* encourage you to collaborate on homework problems with your classmates (and discuss them with me), your final written work should always be entirely your own: *even if your solution to a given problem was the product of a collaborative effort, your writeup should be unique to you.*

Exams: I anticipate that there will be TWO in-class “midterm” exams and (of course) a final exam.

Exam 1: Monday 6th of October

Exam 2: Wednesday 29th of October (provisionally)

Final Exam: Wednesday 17th of December 8:00-11:00

Grading scheme: Your final grade will be computed as follows:

Homework: 30% Tests: 30% (each midterm weighted equally) Final exam: 40%

For full credit, full work must always be shown. Any absence on a test day will result in a score of 0. It will be possible to make up for a missed test only if documented justification for the absence is provided.

WP/WF and Attendance policy: The official attendance policy of the university states:

Students are expected to attend classes regularly. A student who incurs an excessive number of absences may be withdrawn from a class at the discretion of the professor.

In this class, we interpret ‘excessive’ to mean four or more unexcused absences.

A student withdrawing after the first exam will receive a WF unless he/she has a marginally passing (D) average in the class (taking into account all relevant data: homework grades, exams, attendance).

Academic Honesty: All students are responsible for maintaining the highest standards of honesty and integrity in every phase of their academic careers. The penalties for academic dishonesty are severe and ignorance is not an acceptable defense. See www.uga.edu/honesty.
