Dr. Lorenzini was extremely helpful in answering questions and was very fair. He clearly demonstrated a desire for us to learn, especially applications in real life, not tricks... Excellent teacher!

Marvelous teacher. Very knowledgeable about course and subject material. Very well speaker. Easy to follow board notes. Clear. Challenging tests with difficult grading system.

One of the best professors I have ever had. He made us use our minds to really think for ourselves and his love for the subject is evident through his teaching.

He was an all around good professor. He was interested in the individual.

He really knew his math. He is very smart and always willing to help. He also was interested in what was best for the students by trying to get to know us personally and get us to make study groups.

Dr. Lorenzini presented aspects of the course very clearly. He is an excellent teacher. Every concept was introduced very clearly.

Good job of explaining the step by step methods of problems.

Good teacher. I just didn't have much interest in the subject, which is why I didn't do great.

A very good professor, it is obvious he knows his material well. However, he often appeared superior to us and made it hard to approach with questions. Also, despite having well publicized office hours, he was not available and did not return correspondence when needed. His people skills could be easily improved, making him an outstanding teacher. Be more down to earth with us, be more on our level. Thank you.

I liked how he challenged us to think and not just do calculations mechanically. He used real life problems to help us better understand the material.

He was very enthusiastic and it was evident he cared about his students.

Dr. Lorenzini goes a little bit fast when it comes to teaching material but he by far is the best math teacher I have had. I am lucky to spend my 1<sup>st</sup> semester with him.

One thing I really appreciated was the separate office hours twice a week. The sessions helped me fully understand all of the homework assignments.

I appreciated how he tried to connect with his students on a personal level instead of just a math level.

Very good teacher. He taught us why things are and how to think. I want to have him again. He needs to teach multivariable calc.

Even though I dislike Math a great deal, he is very knowledgeable and teaches very well. One criticism is that after tests, he should go over them better and answer questions on how to do the problems and give the correct answers.
